Special accommodation	16	16

**Number of sickdays**

**Reported crimes per 1 000 residents**

**Completed residences in newly built houses**

Multi-dwelling buildings refer to the number of completed flats.

**Greenhouse gas emissions**

Emissions of CO<sub>2</sub>, CH<sub>4</sub>, N<sub>2</sub>O, HFC, PFC and SF<sub>6</sub> from all sectors of the economy.

**Migration surplus**

The migration surplus is calculated as the net amount between the number of people migrating to the municipality/county and people migrating from the municipality/county.

**Number of sick days**

The number of sick days is defined as the number of days with entitled payment from public insurance systems and from the Social Insurance Agency. The number of sick days with entitled payment from employers is not included.

**Reported redundancy notices**

The statistics only refer to redundancies affecting more than five employees.

**Tax base**

The municipal tax base consists of taxable income from physical individuals. The tax capacity is calculated as the tax base in Swedish crowns per resident at the start of the assessment year.

**Unemployment**

Share of registerbased population (age 16-64) that does not have an employment.

**Value added/GRP**

Gross Regional Product (GRP) is the regional equivalence to Gross National Product (GNP). GRP is equivalent to the value of all production of goods and services in a region, which is stated in current market prices. The sum of all regions' GRP is equivalent to the national GNP.
